Hard working and dedicated with proven engineering leadership experience. Willing to work in an organization of repute which provides me challenging work opportunities, a healthy work environment and a good career growth.

### WORK EXPERIENCE

#### United Health Group

*Sr. Engineering Manager (April 2016 to present)*

- Handling end to end transformation of legacy applications towards micro services architecture.
- Goal is to modernize & transform legacy claims adjudication platforms into an open source microservices based modernized platforms.
- Identification and subsequent phasid decoupling of services and migration to new claims platform.
- Defining and tracking time boxed upskilling programme for all on board.
- Establishing transient architecture wherein new services on cloud will communicate with legacy services yet to be transformed.
- Business rules framework using Drools which enables business partners to create/manage complicated rules without any IT support.

#### HCL Technologies Limited

*Senior Technical Lead (Nov 2011 till Apr 2016)*

- Providing technical oversight for client Direct line Insurance Group.
- SME for web back end policy issuance systems.
- One of the critical initiatives was to completely re-structure the products offered by DLG. This was required as DLG has separated from RBS and wanted it's products across all brands to be more competitive and meet all new regulatory requirements.
- This involved engagement across mainframe and java full stack wherein few new products were deployed on cloud OSE environment.

#### IBM India Pvt Ltd.

*Senior Systems Engineer (Mar 2010 till Nov 2011)*

- SME for savings account system of DBS bank Singapore.
- Engaged in implementing CICS/PLEX for DBS mainframes.
- Lead a team of 5+ people for maintenance and support of DBS bank savings account system.
- Technology stack was primarily mainframes.

#### RBS India Pvt Ltd.

*Software Designer (Nov 2007 to Mar 2010)*

- Engaged in creating an automated RBS Insurance internal No Claims Discount Clearing House removing the need for customers to provide proof of NCD on inter-group business.
- Developed the core NCD matching module for the programme.
- Technology was primarily mainframe full stack.
- Engaged as an individual contributor as well as lead a team of 5+ people to develop and deploy core NCD modules.

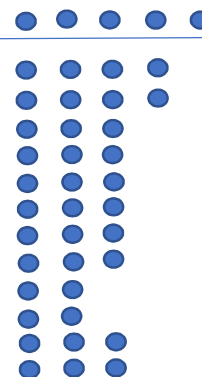

#### Infosys India Pvt Ltd.

*Software Engineer (Sep 2005 to Nov 2007)*

- Engaged in development and maintenance of KODAK back end mainframe systems.
- Role was primarily of an application developer.

### TECHNICAL SKILLS

JAVA full stack  
Microservices architecture  
KAFKA
